**Renaissance Gold Inc.**  
**For the nine months ended March 31, 2019**  
**Management's Discussion and Analysis**

---

## **Introduction**

The following is management's discussion and analysis – quarterly highlights (“MD&A”) of the results of operations and financial condition of Renaissance Gold Inc. (the “Company” or “RenGold”) for the nine months ended March 31, 2019 and up to the date of this MD&A, and has been prepared to provide material updates to the business operations, financial condition, liquidity and capital resources of the Company since its last management discussion and analysis for the fiscal year ended June 30, 2018 (the “Annual MD&A”).

This MD&A should be read in conjunction with the Annual MD&A and the audited consolidated financial statements for the year ended June 30, 2018, together with the notes thereto, and the accompanying unaudited condensed consolidated interim financial statements and related notes thereto for the nine months ended March 31, 2019 (the “Financial Report”).

All financial information in this MD&A is derived from the Company's financial statements prepared in accordance with International Financial Reporting Standards (“IFRS”) and all dollar amounts are expressed in Canadian dollars unless otherwise indicated.

The effective date of this MD&A is May 28, 2019.

## **Description of the Business**

RenGold was incorporated pursuant to the Business Corporations Act (British Columbia) on May 25, 2010 and its common shares are listed for trading on the TSX Venture Exchange (“TSX-V”) under the symbol REN and the OTCQB under the symbol RNSGF. RenGold's operating office is located at 4750 Longley Lane, Suite 106, Reno, NV 89502. RenGold's registered and corporate office is located at Unit 1 – 15782 Marine Drive, White Rock, British Columbia, Canada, V4B 1E6.

RenGold is an exploration stage business engaged in the acquisition and exploration of mineral properties located primarily in Nevada. RenGold's business model is to identify and secure mineral properties for which it seeks suitable funding partners. Once funding partners are found, an exploration and option to earn-in agreement is entered into on the property enabling the earn-in partner to obtain an interest by conducting and funding exploration on that property.

## **Operational Highlights**

### *Generative exploration*

During the nine months ended March 31, 2019, the Company added the Ghost Ranch, Manhattan Gap and McDO exploration projects to its portfolio.

- Ghost Ranch, located in Elko County, Nevada was acquired through staking on open ground. The project is a shallow pediment target located SE of Newmont's Long Canyon Mine and along a northwest trend of gold occurrences. The target is indicated by gravity data, enzyme leach soil geochemistry and a pH survey. The Company is currently seeking a funding partner.
- The Manhattan Gap project is located in Lincoln County, Nevada and was acquired through staking on open ground in the historically productive Pioche (Pb-Zn-Ag) District. The project targets polymetallic carbonate replacement mineralization along the Cambro-Ordovician unconformity. Multiple undrilled targets are indicated by surface sampling, geologic mapping, and a newly completed gravity survey. The Company is currently seeking a funding partner.

**Renaissance Gold Inc.**  
**For the nine months ended March 31, 2019**  
**Management's Discussion and Analysis**

---

- The McDO project is located in Malheur County, Oregon, and was acquired through staking on open ground. The project was generated during reconnaissance exploration around the McDermitt caldera, which is known to host epithermal precious metal mineralization as well as lithium and uranium. The upper levels of the targeted system are represented by anomalous mercury on surface, and the project targets low sulfidation epithermal gold-silver mineralization beneath the mercury occurrence associated with caldera related structures. The Company is currently seeking a funding partner.

*Exploration projects with funding partners*

At the date of this MD&A, RenGold has 8 properties under exploration funding agreements and 1 exploration alliance agreement:

<b>Project</b>	<b>Funding partner</b>
Ecrú	S2 Resources Ltd. ("S2 Resources")
Fat Lizard	OceanaGold U.S. Holding Inc. ("OceanaGold"), a subsidiary of OceanaGold Corporation
Ferguson Mountain	Hochschild Mining (US) Inc. ("Hochschild"), a subsidiary of Hochschild Mining plc
Jake Creek	Ginguro Gold Pty. Ltd. ("Ginguro")
Jupiter	Ramelius Resources Limited ("Ramelius")
Mars	Hochschild
Silicon	AngloGold Ashanti North America, Inc. ("AngloGold")
Spring Peak	OceanaGold
Exploration alliance	Coeur Mining, Inc. ("Coeur")

The highlights of activity by RenGold and its funding partners on its exploration properties during nine months ended March 31, 2019 and to the date of this MD&A follow.

**S2 Resources** Nevada Star Exploration LLC, a wholly owned subsidiary of S2 Resources has an option to acquire a 70% interest in the **Ecrú** project located in Lander County, Nevada, by spending US\$3,000,000 over a 5-year period, with a committed expenditure of US\$200,000 by the second anniversary. On February 14, 2019, the Company announced the results from the initial stratigraphic drilling program. Two holes, totaling 4,105 feet were drilled with the following combined objectives: determining the thickness of the upper plate stratigraphy; determining the depth to the more prospective lower plate carbonate stratigraphy; collecting preliminary data on the subsurface geochemistry and alteration within the project area; and testing two geophysical anomaly scenarios, namely an audiomagnetotelluric (AMT) conductivity high coincident with a gravity high, and an AMT low coincident with a gravity low adjacent to interpreted intersecting structures which may have acted as conduits for mineralizing fluids. Neither hole successfully penetrated into the more prospective lower plate carbonate sequence beneath the upper plate siliciclastic sequence, but hole NECD0001 intersected a 229 foot (83 metre) thick section of limestone and calcareous mudstones within the siliciclastic sediments. It is not yet known if this represents part of the upper plate siliciclastic sequence, or a thrust wedge of prospective lower plate carbonates structurally interleaved into the upper plate sequence. The main part of the AMT anomaly, which appears to be open along the project's southern and western boundaries adjacent to Barrick's Robertson property, is as yet untested. Samples will be submitted for biostratigraphic age dating using microfossils in order to clarify the stratigraphy and the potential for such structural repetition and interleaving of upper and lower plate rocks. Following the completion of the biostratigraphic dating and a comprehensive evaluation of the Phase 1 results, the next steps for further exploration on the project will be decided.

**OceanaGold** In January and February 2019, the Company announced it has entered into earn-in agreements with OceanaGold on its **Spring Peak** and **Fat Lizard** exploration projects.

OceanaGold Corporation is a mid-tier, high-margin, multinational gold producer with assets located in the Philippines, New Zealand and the United States. The Company's assets include: the Didipio Gold-Copper Mine on Luzon Island in the Philippines; the Macraes Goldfield Mine on the South Island of New Zealand; the Waihi Gold Mine on the North Island of New Zealand; and the Haile Gold Mine located in South Carolina, United States of America. OceanaGold also has a significant pipeline of organic growth and exploration opportunities in the Americas and Asia-Pacific regions.

#### Spring Peak

On January 25, 2019, the Company announced that it had entered into an earn-in agreement with OceanaGold granting OceanaGold the option to acquire a 51% interest in the Spring Peak exploration project located in Nevada. Pursuant to the agreement, OceanaGold paid the Company US\$15,000 on signing. To maintain the option, OceanaGold must pay the Company an additional US\$200,000 and spend US\$4,000,000 (US\$150,000 committed) over a five year period. Once vested, OceanaGold has a one-time option to elect to earn an additional 24% interest by spending an additional US\$6,000,000 by January 17, 2028. If a party's participating interest in the joint venture is reduced to ten percent (10%) or less then such party's participating interest shall automatically be converted to a 1% NSR royalty.

The Spring Peak project is located in Mineral County, Nevada and hosts a low-sulfidation epithermal gold system with significant gold (many multi-gram samples, up to 35 g/t) associated with an anomalous pathfinder geochemical signature on surface. The system is fully preserved from surface sinters to basement, contains classic banded veins and quartz after calcite boiling textures. Historic drilling from the 1980s and 1990s consisted of shallow, mostly vertical drill holes, but consistently encountered anomalous gold mineralization, with assays from drill chips up to 1.9 g/t Au. Several targets exist on the property to test for high-grade bonanza veins associated with boiling horizons.

#### Fat Lizard

On February 20, 2019, the Company announced that it had entered into an earn-in agreement with OceanaGold granting OceanaGold the option to acquire a 51% interest in the Fat Lizard exploration project located in Nevada. Pursuant to the agreement, OceanaGold paid the Company US\$25,000 on signing. To maintain the option, OceanaGold must pay the Company an additional US\$200,000 and spend US\$3,000,000 (US\$250,000 committed) over a five year period. Once vested, OceanaGold has a one-time option to elect to earn an additional 24% interest by spending an additional US\$5,000,000 by February 14, 2028. Once vested, the parties will contribute capital for the joint venture's expenditures in accordance with their respective participating interests subject to straight-line dilution. If a party's participating interest in the joint venture is reduced to ten percent (10%) or less then such party's participating interest shall automatically be converted to a 2% NSR royalty.

The Fat Lizard project, Nye County, Nevada comprises a gold and silver bearing volcanic-hosted, low- sulfidation epithermal system. The presence of steam-heated alteration suggests a shallow level of exposure above a boiling zone. Mineralization occurs along a 1.2 km long mineralized fault zone and is open to the west. A half-graben setting controls mineralization and suggests structural intersections and horsetailing are present at moderate depths. Spectral measurements have been used to map high-level alteration including kaolinite, dickite, and alunite-bearing zones. Limited illite-smectite alteration is present in a narrow upthrown structural block and is associated with anomalous gold (up to 0.49 g/t) and silver (up to 10.8 g/t). Potential Au-Ag-rich mineralization may occur at relatively shallow depths within a boiling horizon. This prospect has never been drilled.

**Renaissance Gold Inc.**  
**For the nine months ended March 31, 2019**  
**Management's Discussion and Analysis**

---

**Hochschild** On January 17, 2019, the Company announced that it had entered into an earn-in agreements with Hochschild, granting Hochschild the option to acquire a 51% interest in the Company's **Mars** and **Ferguson Mountain** exploration projects located in Nevada. Pursuant to the agreements, Hochschild paid the Company US\$50,000 on signing.

Hochschild Mining plc is a leading precious metals company listed on the London Stock Exchange (LSE:HOC) with a primary focus on the exploration, mining, processing and sale of silver and gold. Hochschild has over fifty years' experience in the mining of precious metal epithermal vein deposits and currently operates four underground epithermal vein mines, three located in southern Peru and one in southern Argentina. Hochschild also has numerous long-term projects throughout the Americas.

Ferguson Mountain

To maintain the option on the Ferguson Mountain project, Hochschild must pay the Company an additional US\$275,000 and spend US\$3,000,000 (US\$200,000 committed) over a five year period. Once vested, Hochschild has a one-time option to elect to earn an additional 19% interest by spending an additional US\$3,000,000 by December 11, 2027. Once vested, the parties will contribute capital for the joint venture's expenditures in accordance with their respective participating interests subject to straight-line dilution. If a party's participating interest in the joint venture is reduced to ten percent (10%) or less then such party's participating interest shall automatically be converted to a 3% NSR royalty.

The Ferguson Mountain project is located in Elko County, Nevada and hosts a Carlin-type target in Devonian and younger carbonate host rocks. The RenGold technical team completed geologic mapping and soil and rock chip sampling over the project area, which detected geochemical leakage up structure from target horizons at depth. The targets are defined by the intersection of mapped high-angle mineralized structures and several low-angle stratigraphic and structural horizons, including the top of the Devonian unconformity and other horizons where structural and/or chemical ground preparation is likely to be well developed.

Mars

To maintain the option on the Mars project, Hochschild must pay the Company an additional US\$275,000 and spend US\$5,000,000 (US\$300,000 committed) over a five year period. Once vested, Hochschild has a one-time option to elect to earn an additional 19% interest by spending an additional US\$5,000,000 by December 11, 2027. If a party's participating interest in the joint venture is reduced to ten percent (10%) or less then such party's participating interest shall automatically be converted to a varying NSR royalty based on ownership of the relevant claim and any underlying royalties on those claims.

The Mars project is located in Lincoln County, Nevada and hosts a Carlin-type target in lower Paleozoic sedimentary rocks, characterized by anomalous gold in soils, and extensive jasperoid alteration with rock chip assays up to 3.7 g/t Au. The gold system is exposed over a 4.5 km strike length and occurs peripheral to a Mesozoic intrusive center. Historic work included three shallow drill programs which encountered multiple low-grade gold intercepts, but tested the system to a depth of only 250 feet. The RenGold technical team re-mapped the geology and alteration and conducted a detailed gravity survey, which facilitated the development of several new structural and stratigraphic targets on the project.

**Ginguro** The **Jake Creek** project, located in Humboldt County, Nevada is subject to an earn-in agreement with Ginguro. Ginguro completed a 1000-sample soil geochemistry program, utilizing ALS Minerals' Ionic Leach™ method. The results of this survey have been evaluated and integrated with geophysical and drill data to plan the next phase of drilling on the project.

**Renaissance Gold Inc.**  
**For the nine months ended March 31, 2019**  
**Management's Discussion and Analysis**

---

**Ramelius** The **Jupiter** project, located in Nye County, Nevada is subject to an earn-in agreement with Ramelius. A Phase 2 follow-up drilling program was completed in August 2018 and was designed to follow-up gold intercepts encountered in the 2017 program. The program consisted of 7 reverse circulation drill holes totaling 1547 meters (5075 feet).

The program encountered several anomalous intercepts associated with jasperoidal alteration developed along the Tertiary-Paleozoic contact and in proximity to the graben bounding basement faults, however no increase in grade was observed. The basement structures intercepted in hole JURC0010 were visually encouraging, but unmineralized. RenGold and Ramelius are evaluating the results to decide on additional exploration on the project.

**AngloGold** The **Silicon** project is under option to AngloGold and is located in the Bare Mountain mining district, Nye County, Nevada. The Silicon project is near Corvus Gold Inc's (TSX.V:KOR) North Bullfrog and Mother Lode projects, and the Sterling mine, which was reported as being recently acquired by Coeur Mining, Inc. (NYSE:CDE) from Northern Empire Resources (TSX.V:NM) for \$117 million. Both properties have been active and reporting good drill results.

On September 17, 2018, RenGold reported that AngloGold had completed an initial drilling test comprised of 2,346 meters in six core holes at one of several target areas on the Silicon project. The program goal was to test the deeper levels of a large, exposed alteration zone, initially identified by RenGold geologists as characteristic of the barren, upper levels of a low sulfidation epithermal system. The work completed by AngloGold to date has demonstrated that the alteration system is representative of a low sulfidation epithermal system centered around the Silicon Fault target. The alteration system observed supports a follow up combined core and reverse circulation drilling program of approximately 17,000 meters began in Q4 2018.

**Coeur** The Company entered into an exploration alliance agreement with Coeur in May 2017 whereby Coeur agreed to fund US\$250,000 per year in generative exploration expenses for a minimum of two years, during which the parties will identify and explore potential precious metals mining opportunities on lands in the State of Nevada within defined areas of interest. Coeur advanced the Company the first US\$250,000 in June 2017 and the second US\$250,000 in May 2018. RenGold must use this funding to identify and stake properties that will then be presented to Coeur. Upon presentation Coeur will then have 50 calendar days to elect to enter into an exploration earn-in agreement under terms that have been agreed to by the parties. In May 2019, the Company presented two additional target properties to Coeur and is awaiting their decision.

### **Qualified Person**

All technical data, as disclosed in this MD&A, has been verified by the Company's qualified person, Robert Felder, M.Sc. and Certified Professional Geologist as recognized by the American Institute of Professional Geologists (AIPG).

### **Trends**

The Company is an exploration company. At this time, issues of seasonality or market fluctuations have a minor impact on the expenditure patterns, although the majority of the USA exploration costs are incurred in the months of June through November. The Company expenses its exploration, project investigation and general and administration costs, and these amounts are included in the net loss for each quarter. The level of the Company's exploration expenditures is largely determined by the strength of its ability to obtain funding partners for its projects.

**Renaissance Gold Inc.**  
**For the nine months ended March 31, 2019**  
**Management's Discussion and Analysis**

---

**Financial Condition – nine months ended March 31, 2019**

RenGold began the current fiscal year with \$4,677,008 cash, of which \$454,112 was dedicated for exploration and reclamation on projects under earn-in. During the nine months ended March 31, 2019, the Company spent \$1,938,265 on operating activities, net of funding partner contributions and working capital changes, and spent \$44,139 on investing activities, with a positive \$9,812 effect of foreign exchange on cash to end at March 31, 2019 with \$2,704,416 cash, of which \$166,710 was dedicated for exploration on projects under earn-in.

*Operating activities*

Exploration and evaluation expenditures on RenGold projects for the nine months ended March 31, 2019, totaled \$1,761,764 (2018 - \$1,577,067). Of the amount expended, partners funded \$1,126,833 (2018 - \$1,018,872) and RenGold funded the balance of \$634,931 (2018 - \$558,195). Included in exploration and evaluation expenditures is \$496,249 (2018 - \$565,786) of annual claim maintenance fees of which funding partners funded \$296,509 (2018 - \$297,301). In addition to the exploration and evaluation expenditures recorded in RenGold's accounts, funding partners also conducted additional exploration programs directly on RenGold's projects as required under the particular exploration earn-in agreements.

Salaries and benefits charged to administration totaled \$450,331 (2018 - \$498,356) for the nine months ended March 31, 2019. Salaries and benefits charged to exploration and evaluation expenditures were an additional \$437,093 (2018 - \$446,303) of which \$140,221 (2018 - \$185,682) was recovered from funding partners.

Management fees earned for the nine months ended March 31, 2019 totaled \$52,904 (2018 - \$54,385) and relate to a fee charged to funding partners on projects where RenGold is the operator. Management fees earned in the nine months ended March 31, 2019 relate primarily to fees earned on the Spruce East project and on the exploration alliance with Coeur.

Regulatory and transfer agent fees totaled \$67,993 (2018 - \$35,722) for the nine months ended March 31, 2019. The increase relates primarily to the cost of the Company's initial listing on the OTCQB.

Shareholder relations totaled \$119,551 (2018 - \$67,706) for the nine months ended March 31, 2019. The increase in shareholder relation relates to increased attendance at various investor conferences.

Non-cash share-based compensation expense was \$263,448 (2018 - \$222,653) which relates to stock options that were granted and vested during the period.

**Liquidity and Capital Resources**

As at March 31, 2019, the Company had working capital of \$2,630,457.

In April 2019, the Company completed a non-brokered private placement with Altius Minerals Corporation through the issue of 5,716,216 units at a price of \$0.25 per unit for gross proceeds of \$1,429,054. Each unit consists of one common share and one share purchase warrant with each share purchase warrant exercisable into one common share of the Company at a price of \$0.50 per share until April 30, 2024. If the daily volume weighted average trading price of the common shares of the Company is at least \$0.75 per share for 20 consecutive trading days in the period, the Company will have the right, exercisable within three trading days thereof, to accelerate the expiry date of the warrants to the date which is 30 days after notice is given to the holders of the warrants of the accelerated expiry date and a news release to that effect is given.

Management estimates that its working capital at March 31, 2019 plus the April private placement will provide the Company with sufficient financial resources to carry out currently planned exploration and operations through the next twelve months.

**Renaissance Gold Inc.**  
**For the nine months ended March 31, 2019**  
**Management's Discussion and Analysis**

---

At the date of this MD&A, the Company has 17,903,332 exercisable warrants outstanding at exercise prices ranging from \$0.48 to \$0.60, and 4,065,000 exercisable stock options outstanding at exercise prices ranging from \$0.205 to \$0.57, that if exercised will raise additional capital for the Company.

### **Contractual Obligations**

The Company's expenditure commitments on its exploration and evaluation assets are primarily at the Company's discretion. License fees and details of lease payments and minimum work commitments to maintain the option agreement and the underlying exploration and evaluation asset option agreements are described in the notes to the Financial Report. The Company will fund these expenditures with existing working capital.

The Company has an obligation under an operating lease for its US subsidiary's corporate office in Reno, Nevada until June 2019 as described in the notes to the Financial Report.

### **Related Party Transactions**

There are no additional related party transactions other than those disclosed in Note 14 of the Financial Report.

### **Additional Disclosure for Venture Issuers without Significant Revenue**

The components of exploration costs are described in Note 8 to the Financial Report.

### **Outstanding Share Data as at the date of this MD&A**

The authorized share capital of RenGold consists of an unlimited number of common shares and an unlimited number of preferred shares issuable in series with special rights or restrictions attached.

	<b>Common Shares issued and outstanding</b>	<b>Warrants</b>	<b>Stock Options</b>
Balance, March 31, 2019	62,744,814	17,903,332	4,065,000

## **1. NATURE OF OPERATIONS**

---

Renaissance Gold Inc. (the “Company” or “RenGold”) was incorporated pursuant to the *Business Corporations Act* (British Columbia) on May 25, 2010. The Company’s common shares are listed for trading on the TSX Venture Exchange under the symbol REN and the OTCQB under the symbol RNSGF. RenGold’s head office is located at 4750 Longley Lane, Suite 106, Reno, NV 89502. RenGold’s registered and corporate office is located at Unit 1 – 15782 Marine Drive, White Rock, British Columbia, Canada, V4B 1E6.

RenGold is an exploration stage business engaged in the acquisition and exploration of mineral properties located in the western United States of America (“USA”). The Company is in the process of exploring its exploration and evaluation assets and has not yet determined whether any of its properties contain mineral reserves that are economically recoverable. The recoverability of the amounts spent for exploration and evaluation assets is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the exploration and development of its properties, and upon future profitable production or proceeds from the disposition of the properties.

The operations of the Company will require various licenses and permits from various governmental authorities which are or may be granted subject to various conditions and may be subject to renewal from time to time. There can be no assurance that the Company will be able to comply with such conditions and obtain or retain all necessary licenses and permits that may be required to carry out exploration, development and mining operations at its projects. Failure to comply with these conditions may render the licences liable to forfeiture.

These condensed consolidated interim financial statements have been prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business in the foreseeable future. As at March 31, 2019, the Company had working capital of \$2,630,457. In April 2019, the Company completed a non-brokered private placement for gross proceeds of \$1,429,054 (Note 17). Management estimates that these funds will provide the Company with sufficient financial resources to carry out currently planned exploration and operations through the next twelve months.

These condensed consolidated interim financial statements do not reflect adjustments that would be necessary if the going concern assumption were not appropriate.

## **2. BASIS OF PRESENTATION**

---

### **Statement of compliance**

These condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standard 34 Interim Financial Reporting (“IAS 34”) as issued by the International Accounting Standards Board (“IASB”). The policies applied in these condensed consolidated interim financial statements are based on International Financial Reporting Standards (“IFRS”) issued and outstanding as at the date the Board of Directors approved these condensed consolidated interim financial statements for issue.

These condensed consolidated interim financial statements do not include all of the information and disclosures required by IFRS for annual financial statements and therefore should be read in conjunction with the Company’s annual consolidated financial statements for the year ended June 30, 2018.

### **Basis of measurement**

These condensed consolidated interim financial statements have been prepared on the historical cost basis except for certain financial instruments which are measured at fair value. In addition, these condensed consolidated interim financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

## **2. BASIS OF PRESENTATION (continued)**

---

### **Functional and presentation currency**

These condensed consolidated interim financial statements are presented in Canadian dollars, which is the parent Company's functional currency as well as being the functional currency for the Company's Canadian subsidiaries. The US dollar is the functional currency for the Company's US subsidiaries.

### **Use of estimates and judgments**

The preparation of the consolidated financial statements in conformity with IFRS requires management to make estimates, judgments and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

#### **(i) Critical accounting estimates**

Critical accounting estimates are estimates and assumptions made by management that may result in a material adjustment to the carrying amount of assets and liabilities within the next financial year and are, but are not limited to, the following:

The carrying value and the recoverability of exploration and evaluation assets - Management has determined that exploration and evaluation costs incurred which were capitalized may have future economic benefits and may be economically recoverable. Management uses several criteria in its assessments of economic recoverability and probability of future economic benefits including geologic and other technical information, scoping and feasibility studies, accessibility of facilities and existing permits.

Share-based compensation - The fair value of stock options issued are subject to the limitation of the Black-Scholes option pricing model which incorporates market data and which involves uncertainty and subjectivity in estimates used by management in the assumptions. Changes in the input assumptions can materially affect the fair value estimate of stock options.

Recovery of deferred tax assets - Judgment is required in determining whether deferred tax assets are recognized in the statement of financial position. Deferred tax assets, including those arising from unutilized tax losses, require management to assess the likelihood that the Company will generate taxable earnings in future periods, in order to utilize recognized deferred tax assets. Estimates of future taxable income are based on forecast cash flows from operations and the application of existing tax laws in each jurisdiction. To the extent that future cash flows and taxable income differ significantly from estimates, the ability of the Company to realize the net deferred tax assets recorded at the date of the statement of financial position could be impacted.

Additionally, future changes in tax laws in the jurisdictions in which the Company operates could limit the ability of the Company to obtain tax deductions in future periods.

The Company has not recorded any deferred tax assets.

#### **(ii) Critical accounting judgments**

Information about critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the consolidated financial statements are, but are not limited to, the following:

Determination of functional currency - In accordance with IAS 21, "The Effects of Changes in Foreign Exchange Rates" management determined that the functional currency of the parent Company as well as the Company's Canadian subsidiaries is the Canadian dollar and the functional currency of its US subsidiaries is the US dollar.

### **3. SIGNIFICANT ACCOUNTING POLICIES**

---

The accounting policies applied by the Company in these condensed consolidated interim financial statements are the same as those applied by the Company as at and for the year ended June 30, 2018, except as noted below:

#### **Financial instruments**

IFRS 9 Financial Instruments (“IFRS 9”) replaced IAS 39 Financial Instruments: Recognition and Measurement (“IAS 39”) and all previous versions of IFRS 9. There was no material impact to the Company’s consolidated financial statements as a result of transitioning to IFRS 9 on July 1, 2018.

IFRS 9 uses a single approach to determine whether a financial asset is classified and measured at amortized cost or at fair value. The classification and measurement of financial assets is based on the Company’s business models for managing its financial assets and whether the contractual cash flows represent solely payments of principal and interest (“SPPI”). Financial assets are initially measured at fair value and are subsequently measured at either (i) amortized cost; (ii) fair value through other comprehensive income, or (iii) at fair value through profit or loss.

#### *Amortized cost*

Financial assets classified and measured at amortized cost are those assets that are held within a business model whose objective is to hold financial assets in order to collect contractual cash flows, and the contractual terms of the financial asset give rise to cash flows that are SPPI. Financial assets classified at amortized cost are measured using the effective interest method.

#### *Fair value through other comprehensive income (“FVTOCI”)*

Financial assets classified and measured at FVTOCI are those assets that are held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets, and the contractual terms of the financial asset give rise to cash flows that are SPPI.

This classification includes certain equity instruments where IFRS 9 allows an entity to make an irrevocable election to classify the equity instruments, on an instrument-by-instrument basis, that would otherwise be measured at FVTPL to present subsequent changes in FVTOCI.

#### *Fair value through profit or loss (“FVTPL”)*

Financial assets classified and measured at FVTPL are those assets that do not meet the criteria to be classified at amortized cost or at FVTOCI. This category includes debt instruments whose cash flow characteristics are not SPPI or are not held within a business model whose objective is either to collect contractual cash flows, or to both collect contractual cash flows and sell the financial asset.

Consistent with IAS 39, financial liabilities under IFRS 9 are generally classified and measured at fair value at initial recognition and subsequently measured at amortized cost.

---

**3. SIGNIFICANT ACCOUNTING POLICIES (continued)**

---

**Financial instruments (continued)**

The following table summarizes the classification of the Company's financial instruments under IAS 39 and IFRS 9:

	<b>IAS 39</b>	<b>IFRS 9</b>
<b>Financial assets</b>		
Cash	FVTPL	FVTPL
Marketable securities	Available for sale	FVTOCI
Receivables	Loans and receivables	Amortized cost
Amounts due from funding partners	Loans and receivables	Amortized cost
Reclamation bonds	Loans and receivables	Amortized cost
<b>Financial liabilities</b>		
Trade and other payables	Other financial liabilities	Amortized cost
Amounts due to funding partners	Other financial liabilities	Amortized cost

**New standards, interpretations and amendments not yet effective**

A number of new standards, amendments to standards and interpretations are not yet effective as of March 31, 2019 and have not been applied in preparing these consolidated financial statements.

New standard IFRS 16, Leases

All leases result in the lessee obtaining the right to use an asset at the start of the lease and, if lease payments are made over time, also obtaining financing. Accordingly, from the perspective of the lessee, IFRS 16 eliminates the classification of leases as either operating leases or finance leases as is required by IAS 17 Leases and, instead, introduces a single lessee accounting model. When applying that model, a lessee is required to recognize assets and liabilities. A lessor continues to classify its leases as operating leases or finance leases, and accounts for those two types of leases differently. This standard is effective for annual periods beginning on or after January 1, 2019.

The Company has not early adopted this new standard and this new standard is not expected to have a material effect on the financial statements.

**8. EXPLORATION AND EVALUATION ASSETS**

RenGold acquires mineral properties through staking and from third party vendors, some of which are subject to a net smelter return (“NSR”) royalty. Subsequently, the Company may enter into agreements to sell a portion of its interest in its mineral properties to third parties in exchange for exploration expenditures, royalty interests, cash, and/or share-based payments.

RenGold cannot guarantee title to all of its exploration and evaluation assets as the properties may be subject to prior mineral rights applications with priority, prior unregistered agreements or transfers and title may be affected by undetected defects.

Exploration and evaluation assets capitalized to the consolidated statements of financial position are as follows:

	<b>June 30, 2018</b>	<b>Additions</b>	<b>Recoveries</b>	<b>Written off</b>	<b>Foreign exchange adjustment</b>	<b>March 31, 2019</b>

## **8. EXPLORATION AND EVALUATION ASSETS (continued)**

---

Details on the Company's exploration and evaluation assets are found in Note 9 of the June 30, 2018 consolidated financial statements and new items are noted below.

### **Ecru, Lander County, Nevada**

On July 30, 2018, the Company entered into a mining sublease agreement with Newmont USA Limited ("Newmont"). The agreement covers certain lands adjacent to the Company's already controlled claims. The agreement is for a period of 10 years, with an option to extend the lease for an additional 5 years, and then indefinitely so long as mining, development or processing operations are being conducted on the property on a continuous basis. RenGold paid Newmont \$29,406 (US\$22,500) on signing and is required to make anniversary payments of US\$22,500 per year for the first five years and US\$45,000 per year thereafter. These payments will be deemed advance royalty payments to be offset against any future royalty obligations to Newmont in the event of a mine being developed. Newmont holds a 0.875% NSR royalty and the underlying lease holder holds a 2.125% NSR royalty.

The Ecru project is subject to an earn-in agreement with Nevada Star Exploration LLC ("Nevada Star"), a wholly owned subsidiary of S2 Resources Ltd. The agreement grants Nevada Star the option to acquire a 70% interest in the Ecru project. Nevada Star will be responsible for payment of the Newmont sub-lease during the term of the Nevada Star agreement.

### **Fat Lizard, Nye County, Nevada**

On February 14, 2019, the Company entered into an earn-in agreement with OceanaGold U.S. Holdings Inc. ("OceanaGold"), a subsidiary of OceanaGold Corporation granting OceanaGold the option to acquire a 51% interest in the Fat Lizard exploration project. Pursuant to the agreement, OceanaGold paid the Company \$32,976 (US\$25,000) on signing. This payment was first credited against the acquisition costs for \$1,388 (US\$1,054) with the remainder of \$31,588 (US\$23,946) being recorded as exploration and evaluation recoveries for the nine months ended March 31, 2019. To maintain the option, OceanaGold must pay the Company an additional US\$200,000 and spend US\$3,000,000 (US\$250,000 committed) over a five year period. Once vested, OceanaGold has a one-time option to elect to earn an additional 24% interest by spending an additional US\$5,000,000 by February 14, 2028. Once vested, the parties will contribute capital for the joint venture's expenditures in accordance with their respective participating interests subject to straight-line dilution. If a party's participating interest in the joint venture is reduced to ten percent (10%) or less then such party's participating interest shall automatically be converted to a 2% NSR royalty.

### **Ferguson Mountain, Elko Country, Nevada**

On December 11, 2018, the Company entered into an earn-in agreement with Hochschild Mining (US) Inc. ("Hochschild"), a subsidiary of Hochschild Mining plc, granting Hochschild the option to acquire a 51% interest in the Ferguson Mountain exploration project. Pursuant to the agreement, Hochschild paid the Company \$32,979 (US\$25,000) on signing which was credited against acquisition costs. To maintain the option, Hochschild must pay the Company an additional US\$275,000 and spend US\$3,000,000 (US\$200,000 committed) over a five year period. Once vested, Hochschild has a one-time option to elect to earn an additional 19% interest by spending an additional US\$3,000,000 by December 11, 2027. Once vested, the parties will contribute capital for the joint venture's expenditures in accordance with their respective participating interests subject to straight-line dilution. If a party's participating interest in the joint venture is reduced to ten percent (10%) or less then such party's participating interest shall automatically be converted to a 3% NSR royalty.

### **Ghost Ranch, Elko County, Nevada**

The Company holds its interest in the Ghost Ranch project through directly held unpatented claims.

### **Manhattan Gap, Lincoln County, Nevada**

The Company holds its interest in the Manhattan Gap project through directly held unpatented claims.

---

**8. EXPLORATION AND EVALUATION ASSETS (continued)**

---

**Mars, Lincoln County, Nevada**

On December 11, 2018, the Company entered into an earn-in agreement with Hochschild, granting Hochschild the option to acquire a 51% interest in the Mars exploration project. Pursuant to the agreement, Hochschild paid the Company \$32,967 (US\$25,000) on signing. This payment was first credited against the acquisition costs for \$19,775 (US\$15,000) with the remainder of \$13,192 (US\$10,000) being recorded as exploration and evaluation recoveries for the nine months ended March 31, 2019. To maintain the option, Hochschild must pay the Company an additional US\$275,000 and spend US\$5,000,000 (US\$300,000 committed) over a five year period. Once vested Hochschild has a one-time option to elect to earn an additional 19% interest by spending an additional US\$5,000,000 by December 11, 2027. If a party's participating interest in the joint venture is reduced to ten percent (10%) or less then such party's participating interest shall automatically be converted to a varying NSR royalty based on ownership of the relevant claim and any underlying royalties on those claims.

On November 26, 2018, the Company entered into an option agreement to acquire 11 unpatented mining claims adjacent to and just south of the Mars project. The owners retain a 1.5% NSR royalty, 1% of which may be purchased for US\$1,000,000.

To maintain the option, the Company is required to make annual payments as follows:

Date	Payment US\$
On execution of the option agreement	\$5,000 (paid)
November 26, 2019	\$5,000
November 26, 2020	\$10,000
November 26, 2021	\$10,000
November 26, 2022	\$15,000
November 26, 2023	\$20,000
November 26, 2024	\$25,000
November 26, 2025	\$25,000
November 26, 2026	\$50,000
November 26, 2027	\$50,000
November 26, 2028	\$85,000

**McDO, Malheur County, Oregon**

The Company holds its interest in the McDo project through directly held unpatented claims.

**South Roberts, Eureka County, Nevada**

The Company holds its interest in the South Roberts project through directly held unpatented claims.

Effective July 31, 2017, until it was terminated October 19, 2018, the Company was party to an exploration earn-in agreement with Nevada Star.

Effective January 2, 2012, until it was terminated May 1, 2019, the Company was party to a mineral lease and option to purchase agreement with Harvest Gold Corporation (US).

**Spring Peak, Mineral County, Nevada**

On January 17, 2019, the Company entered into an earn-in agreement with OceanaGold granting OceanaGold the option to acquire a 51% interest in the Spring Peak exploration project. Pursuant to the agreement, OceanaGold paid the Company \$19,788 (US\$15,000) on signing which was credited against acquisition costs. To maintain the option, OceanaGold must pay the Company an additional US\$200,000 and spend US\$4,000,000 (US\$150,000 committed) over a five year period.

**RENAISSANCE GOLD INC.**
**NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

(Unaudited – Expressed in Canadian dollars)

Nine months ended March 31, 2019

**8. EXPLORATION AND EVALUATION ASSETS (continued)**
**Spring Peak, Mineral County, Nevada (continued)**

Once vested, OceanaGold has a one-time option to elect to earn an additional 24% interest by spending an additional US\$6,000,000 by January 17, 2028. If a party's participating interest in the joint venture is reduced to ten percent (10%) or less then such party's participating interest shall automatically be converted to a 1% NSR royalty.

**Spruce East, Elko County, Nevada**

Effective May 15, 2017, until it was terminated December 20, 2018, the Company was party to an exploration earn-in agreement with Kinross Gold U.S.A., Inc. ("Kinross USA"). Kinross USA's right of first refusal to acquire up to three additional properties within a defined area of interest in Nevada expired with the termination of the Spruce East agreement.

Exploration and evaluation expenditures included in the loss for the nine months ended March 31, 2019 and 2018 are as follows:

**10. RECLAMATION BONDS**

The Company is required to post bonds, with the Bureau of Land Management and/or the State of Nevada and/or the USDA Forest Service as appropriate, for reclamation of planned mineral exploration programs work associated with the Company's exploration and evaluation assets located in the United States. For the Company's exploration and evaluation assets that are being actively explored under funding arrangement agreements, the funding partners are responsible for bonding for the surface disturbance created by the exploration programs funded by each of them on those projects. In some cases, the Company purchases the bonding for funding partners in its own name for which it is reimbursed by the funding partner. When the surface disturbance is reclaimed and paid for by the funding partner and the bond is eventually released to the Company, the Company will pay the proceeds of the bond to that funding partner.

**13. SHARE CAPITAL**

**a) Authorized share capital**

The authorized share capital is comprised of an unlimited number of common shares without par value and an unlimited number of preferred shares without par value.

**b) Issued share capital**

At March 31, 2019, the Company had 62,744,814 (June 30, 2018 – 62,744,814) common shares issued and outstanding. A summary of changes in share capital and reserves is contained on the condensed consolidated interim statements of changes in equity for the nine months ended March 31, 2019 and 2018.

**c) Warrants**

The continuity of warrants for the nine months ended March 31, 2019 is as follows:

<b>Expiry date</b>	<b>Exercise price</b>	<b>Balance, June 30, 2018</b>	<b>Granted</b>	<b>Exercised</b>	<b>Expired</b>	<b>Balance, March 31, 2019</b>
June 30, 2019	\$0.60	4,900,000	-	-	-	4,900,000
May 16, 2023 *	\$0.48	13,003,332	-	-	-	13,003,332
		17,903,332	-	-	-	17,903,332
Weighted average exercise price		\$0.51	\$0.00	\$0.00	\$0.00	\$0.51

\* If the volume weighted average trading price of the common shares of the Company is at least \$0.72 per share for 20 consecutive trading days in the period commencing four months and a day after the closing date, the Company will have the right, exercisable within three trading days thereof, to accelerate the expiry date of the warrants to the date which is 30 days after notice is given to the holders of the warrants of the accelerated expiry date and a news release to that effect is given.

**RENAISSANCE GOLD INC.****NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

(Unaudited – Expressed in Canadian dollars)

Nine months ended March 31, 2019

**13. SHARE CAPITAL (continued)****d) Stock options**

On December 7, 2018, the Company's shareholders approved a rolling stock option plan (the "Plan") pursuant to which the Company may grant incentive stock options to directors, officers, employees and consultants. The Plan permits the granting of up to 10% of the common shares of the Company issued and outstanding at the date of grant. The exercise price of an option shall not be less than the discounted market price at the time of granting as prescribed by the policies of the TSX Venture Exchange. The maximum term of the stock options is ten years from the grant date. Vesting terms are at the discretion of the directors.

The continuity of stock options for the nine months ended March 31, 2019 is as follows:

<b>Expiry date</b>	<b>Exercise price</b>	<b>Balance, June 30, 2018</b>	<b>Granted</b>	<b>Exercised</b>	<b>Expired/cancelled</b>	<b>Balance, March 31, 2019</b>
August 19, 2019	\$0.48	560,000	-	-	(30,000)	530,000
August 18, 2021	\$0.57	835,000	-	-	(25,000)	810,000
July 24, 2022	\$0.265	838,000	-	-	(13,000)	825,000
December 19, 2022	\$0.265	20,000	-	-	-	20,000
August 14, 2023	\$0.205	-	1,880,000	-	-	1,880,000
		2,253,000	1,880,000	-	(68,000)	4,065,000
Weighted average exercise price		\$0.43	\$0.21	\$0.00	\$0.47	\$0.33

At March 31, 2019, all stock options were exercisable.

**e) Share-based compensation**

During the nine months ended March 31, 2019, the Company recorded \$263,448 (2017 - \$222,653) of share-based compensation for options that vested during the period.

On August 14, 2018, the Company granted 1,880,000 stock options with a fair value of \$263,448, or \$0.14 per option, which was recorded as share-based compensation in the nine months ended March 31, 2019. The fair value was estimated on the grant date using the Black-Scholes Option Pricing Model with the following assumptions: 86.28% expected stock price volatility, a 2.23% risk free interest rate, a five year expected life and zero expected dividend yield.

**RENAISSANCE GOLD INC.****NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

(Unaudited – Expressed in Canadian dollars)

Nine months ended March 31, 2019

---

**14. RELATED PARTY TRANSACTIONS**

---

**a) Consulting fees**

During the three and nine months ended March 31, 2019, the Company paid or accrued \$22,500 (2018 – \$22,500) and \$67,500 (2018 - \$67,500) respectively to Golden Oak Corporate Services Ltd. (“Golden Oak”). Golden Oak is a consulting company controlled by the Chief Financial Officer and Corporate Secretary of the Company. Golden Oak provides the services of a Chief Financial Officer, a Corporate Secretary, and accounting and administrative staff to the Company. The Chief Financial Officer and the Corporate Secretary are employees of Golden Oak and are not paid directly by the Company.

**b) Compensation of key management personnel**

Key management includes members of the Board of Directors, the Executive Chairman, the President and Chief Executive Officer, the Chief Financial Officer, and the Corporate Secretary. The aggregate compensation paid, or payable, to key management personnel, which include the amounts disclosed above, during the three and nine months ended March 31, 2019 and 2018 were as follows:

Relationship	Description	Three months ended March 31,		Nine months ended March 31,	
		2019	2018	2019	2018
Officers	Salaries and benefits	\$ 46,327	\$ 68,309	\$ 156,717	\$ 215,866
Golden Oak - Officers	Consulting fees	22,500	22,500	67,500	67,500
Directors and officers	Share-based compensation	-	6,950	154,145	142,661
		\$ 68,827	\$ 97,759	\$ 378,362	\$ 426,027

As at March 31, 2019, the Company owed \$3,325 (June 30, 2018 – \$1,318) to Golden Oak, a director, and the CEO of the Company for the reimbursement of expenditures (Note 11). All amounts are unsecured and non-interest bearing.

---

**15. SEGMENTED INFORMATION**

---

RenGold operates in one business segment being the acquisition and exploration of exploration and evaluation assets and has one geographic segment being the USA. The total assets relate primarily to exploration and evaluation assets and equipment and have been disclosed in Notes 8 and 9.

---

**16. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT**

---

**Financial Instruments**

Financial instruments are classified into one of the following categories: FVTPL; FVTOCI; or at amortized cost. The carrying values of the Company’s financial instruments are classified into the following categories:

<b>Financial Instrument</b>	<b>Category</b>	<b>March 31, 2019</b>	<b>June 30, 2018</b>
Cash	FVTPL	\$ 2,704,416	\$ 4,677,008
Marketable securities	FVTOCI	18,764	18,764
Receivables	Amortized cost	29,126	4,061
Amounts due from funding partners	Amortized cost	37,013	-
Reclamation bonds	Amortized cost	30,297	58,429
Trade and other payables	Amortized cost	(43,275)	(149,367)
Amounts due to funding partners	Amortized cost	(166,710)	(454,112)

The Company’s financial instruments recorded at fair value require disclosure about how the fair value was determined based on significant levels of inputs described in the following hierarchy:

- Level 1 - Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions occur in sufficient frequency and value to provide pricing information on an ongoing basis.
- Level 2 - Pricing inputs are other than quoted prices in active markets included in Level 1. Prices in Level 2 are either directly or indirectly observable as of the reporting date. Level 2 valuations are based on inputs including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the market place.
- Level 3 - Valuations in this level are those with inputs for the asset or liability that are not based on observable market data.

The carrying values of receivables, amounts due from funding partners, reclamation bonds, trade and other payables, and amounts due to funding partners approximate their fair value due to their short-term nature. Cash and marketable securities are recorded at fair value using Level 1 of the fair value hierarchy.

**Risk management**

The Company’s risk management objectives and policies are consistent with those disclosed by the Company for the year ended June 30, 2018.

**17. SUBSEQUENT EVENT**

---

In April 2019, the Company completed a non-brokered private placement with Altius Minerals Corporation through the issue of 5,716,216 units at a price of \$0.25 per unit for gross proceeds of \$1,429,054. Each unit consists of one common share and one share purchase warrant with each share purchase warrant exercisable into one common share of the Company at a price of \$0.50 per share until April 30, 2024. If the daily volume weighted average trading price of the common shares of the Company is at least \$0.75 per share for 20 consecutive trading days in the period, the Company will have the right, exercisable within three trading days thereof, to accelerate the expiry date of the warrants to the date which is 30 days after notice is given to the holders of the warrants of the accelerated expiry date and a news release to that effect is given.
