This presentation contains forward-looking statements and factual information that are current as of the date the presentation was originally delivered. Renaissance Gold Inc. disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Forward-looking statements include, but are not limited to, statements with respect to the timing and amount of estimated future exploration, success of exploration activities, expenditures, permitting, and requirements for additional capital and access to data.

Forward looking statements involve known and unknown risks, uncertainties, and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by the forward looking statements. Such factors include, among others, risks related to actual results of current exploration activities; changes in project parameters as plans continue to be refined; the ability to enter into joint ventures or to acquire or dispose of properties; future prices of mineral resources; accidents, labor disputes and other risks of the mining industry; ability to obtain financing; and delays in obtaining governmental approvals of financing.

The qualified persons for any technical information in this presentation are Ronald L. Parratt, CPG, CEO and Executive Chairman, Renaissance Gold and Robert P. Felder, CPG, President and Director, Renaissance Gold - both Qualified Persons for NI 43-101.

The information in this presentation has been obtained by Renaissance and Kinetic from their own records and from other sources deemed reliable. However, no representation or warranty is made as to its accuracy or completeness.

- Silicon project

Location Map

Modified From Henry and John, 2013
Silicon came about as an extension from work that started in 2013 as the Callinan/Rengold 37-South project royalty for exploration cash agreement.

In May 2015, Callinan Royalties was acquired by Altius Minerals Corporation.

This allowed Rengold to explore southern Nevada. Two projects evolved: Silicon and Golden Shears.

Silicon became an in-house project in 2014 pending land acquisition.

Complete package acquired December 2015 and JV promotion began in 2016.
